

Coronavirus Statement

As the concern over Coronavirus (COVID-19) continues to grow within the UK, we would like to inform you of our current situation and protocols.

The health of both our customers and our team members is our biggest priority. We are closely following Government advice including but not limited to minimising contact, minimising travel, maximising remote meetings, shift work and working from home where possible and have introduced extra stringent and rigorous cleaning and hygiene procedures across our offices, laboratories and manufacturing facilities. In addition, we are conducting routine Occupational Health COVID-19 point of care tests on our team, and anyone who is aware of contact with someone infected with COVID-19 will be quarantined until a test can be conducted to ensure that they are not infected. As we are based in the Derbyshire countryside and with the above extreme and mitigating measures in place since the start of March, our risk is relatively low.

At SureScreen, we have a duty in these trying times to deliver our products and services. We will do everything we can to continue to supply our product range. Our laboratories and offices are open and currently do not have any plans to close. If you can get the samples to us, we are confident that we'll be able to analyse.

We will continue to monitor the situation and follow the direction given by the government and will take whatever action is necessary to protect the health of our customers, teams and the wider community.

Troy Whyte

Managing Director
